

Englewood, CO – December 15, 2017 - KNS adds experienced LTE Engineer to Team.

KNS is excited to have experienced engineer and past employee, Batmunkh, return to the KNS team!

Who is Batmunkh? He is a RF engineer with a master's degree in RF engineering from the University of Denver. His master's research focused on 4G technologies. He worked for KNS five years ago before returning to his home in Mongolia. While in Mongolia, he successfully implemented a nationwide 3G network throughout the country. This major project, overseen by Batmunkh, included a core network replacement, system integration, 650 base station installations, approximately 150 new site infrastructure installations including towers, buildings, fiber optic transmission, and power supply system.

Batmunkh moved back to Denver with his wife and two children. His expertise and depth of RF engineering skills are a welcome addition to our expanding engineering team at KNS.

KNS Communications Consultants is an RF Engineering firm who specializes in engineering, deploying and maintaining outdoor wireless networks around the world. Satisfying its customers since 1979, KNS has developed an expertise for working in some of the most challenging environments around the world. Check us out at www.knsdenver.com.
